Graphing Polynomial

A. Give the possible roots (RRT), nature of roots (DRS), number of roots (FTA), factored form, actual roots, end behavior and graph of the given polynomial.

1) $f(x) = 2x^5 + 4x^4 - 4x^3 - 8x^2 + 2x + 4$

FTA:

Possible Roots: \pm

Factored form:

Actual roots:

End Behavior:

Graph:
