Graphing Polynomial

A. Give the possible roots (RRT), nature of roots (DRS), number of roots (FTA), factored form, actual roots, end behavior and graph of the given polynomial.

1) $f(x) = -2x^5 - x^4 + 9x^3 + 7x^2 - 7x - 6$

FTA:

Possible Roots:

Factored form:

Actual roots:

End Behavior:
