Graphing Polynomial

A. Give the possible roots (RRT), nature of roots (DRS), number of roots (FTA), factored form, actual roots, end behavior and graph of the given polynomial.

1) $f(x) = -x^5 - 2x^4 + 9x^3 + 22x^2 - 4x - 24$

FTA:

Possible Roots:

Factored form:

Actual roots:

End Behavior:
