## Graphing Polynomial

**A. Give the possible roots (RRT), nature of roots (DRS), number of roots (FTA), factored form, actual roots, end behavior and graph of the given polynomial.**

1)  $f(x) = 2x^5 - 4x^4 - 4x^3 + 8x^2 + 2x - 4$

FTA:

Possible Roots:  $\pm$

Factored form:

Actual roots:

End Behavior:

Graph:
